

# Doggie Frosting Recipe

## Ingredients

- 6 oz plain yogurt (We highly recommend Greek yogurt because it's thicker)
- 2 Tablespoons Peanut Butter
- Food coloring if desired

## Steps

1. Mix peanut butter and yogurt together. We mix it right in the yogurt container. Separate into small dishes if you are making several colors.
2. Add food coloring and mix well until you reach the color desired.
3. If needed, thicken with a teaspoon or two of flour. Using wheat flour may change the hue a little so you might want to use white flour. If you use Greek yogurt you will not need to thicken it.

## Tips

- Be sure to wait until your cakes have completely cooled.
- We painted on the frosting with a pastry brush.
- To make letters and dots we put the frosting into a small zip lock and snip a very small corner. Make a very tiny snip for fine lines. You can always cut a bigger hole. It is a mess to try to put it in a new bag to start over and you lose a lot of frosting, so start very small.
- With the extra frosting we painted biscuits using a pastry brush.
- We refrigerated the pup cakes and biscuits to let the frosting set. We found if we used a Greek yogurt, refrigeration was not necessary.
